

## MP100 | DIGITAL IMAGING PROJECT STATEMENT

### **PART I: RASTER**

Title: Images about me

Semester/Year: Spring 2020

Software: Adobe Photoshop

This collage of images represents me, where I'm from, things that I find intriguing and the things that I like. The images represent my love for the outdoors, my birthplace the Dominican republic, interest in outer space, my favorite planet Saturn, my love for The Legend of Zelda and my instrument of choice, the electric guitar. The most challenging part of this project was figuring out the composition and where everything had to be placed in order to look good.

### **PART II: VECTOR**

Title: Robin

Semester/Year: Spring 2020

Software: Adobe Illustrator

For this project, my source of inspiration was my own face. I chose colors that would both look pleasing and that are close to how I look like in real life. It was very difficult to make shapes that looked like my facial features and I tried my best to make the shapes look acceptable.
